

Questions to consider when deciding on a treatment plan

- What treatment options are available to me?
- What symptoms am I hoping to address?
- What are the benefits of the recommended treatments?
- When should I start to see improvements in my symptoms?
- If my symptoms do not improve, what other treatments should we consider?
- Is the treatment safe to use with other medications? What if I'm planning a pregnancy?
- What are the common side effects of the recommended treatment?
- What strategies or treatments can I do at home to help manage my symptoms?
